

What college students would enjoy in Missouri
Daniel

There are various exciting places for you to enjoy in Missouri. But if you ask me to choose the places that young people would enjoy, I have some suggestions for you.

First, I recommend Meramec Caverns. Especially in hot weather Meramec caverns is just the place for you to escape from the scorching heat. Also if you go inside the cave people say it arouses a feeling of mystique. Therefore I strongly recommend this place for you.

Also you must visit the St. Louis Arch. You can go to the top of the arch by a time-capsule like elevator. If you reach the top you can a complete view of Missouri.

Times Beach is a place I recommend. This place was first a place of quarantine due to lethal materials used by a man called Russell Bliss to pave the road. But after years of evacuation and quarantine, now this area sports a lovely park. The park itself provides more than seven miles of trails for hiking, biking and equestrian use, where visitors can see a multitude of wildlife including turkey, geese, deer, and more than forty species of birds. Picnic sites abound and a boat ramp provides easy access to the Meramec River.

As you can see Missouri is definitely a place to relieve stress and have a refreshing break. So, how about planning to go to Missouri with a special person this summer vacation?
