

<Three attractive places in Oklahoma around Rt. 66>

**English Name : LEO
ID Number : 2005101692**

Korean Name : 문계방 (Moon Gye Bang)

It is not easy to decide where to visit in Oklahoma because there are many attractive places to go. We can find a lot of attractions on the web, however since we can't go to every one of them, let's drive Rt. 66 and see what we can find. I have chosen three fun and exciting things to do in Oklahoma around Route 66 to recommend to young people. I would like you to spend your spare vacation in Oklahoma. It will be helpful to look after your soul.

The first one is the Pole Position Raceway in Oklahoma City. Young people enjoy watching and participating in speed events. That's the reason why they like motor sports. By the way, most of them want to be driving when they watch motor races. If they visit here, they can experience the thrill of real racing. The raceway has the fastest karts in the US - that go up to 45mph. A real atmosphere of action sports is also helpful to enjoy speed events.

Second is Oklahoma Brick Town Canal in Oklahoma City. Riding a water taxi through the canal is enough to attract young people who visit Oklahoma City. It is a most popular tourist destination because of its great views. We can enjoy not only seeing beautiful scenery but also talking with a lot of visitors while we are in the taxi. In addition, there are many restaurants and shops along the canal.

The third one is the Tulsa Zoo in Tulsa, Ok. Young people love animals, but they don't have a chance to see many different types of animals except pets like dogs and cats. So visiting the zoo is a simple way to have a happy time enjoying the animals. A variety of weekly scheduled activities are offered by the zoo, making a visit to the zoo even more fun. What do you think about those recommendations? Are you excited to visit Oklahoma along Rt. 66? Go and enjoy driving go-karts at the raceway, riding the water taxi at the canal and enjoying the animals at the zoo. These help you to certainly lower your stress.
