[TOPIC SENTENCE:....about what young people would enjoy doing on Rt. 66 in Kansas]

In Kansas, you can experience an unknown world. The unknown world is space, underground and God. Everyone is curious about these. If you have this experience everyone will envy you. Let's find out how.

The Kansas Cosmosphere and Space Center is in Hutchison. Young people are curious about space. In this center, a variety of things are displayed like a moon diaper, Lunokhod, and an Apollo X1 moon rock. There is also a large painting, "Dream." The moon, a couple of astronauts, the Hubble space telescope and other space adventure images fill this canvas.

The Kansas Underground Salt Museum, in Hutchison, gives visitors a mine tour. Many people feel fear at the mine. However, in this mine, everything is spacious, comfortable, and very quiet. Visitors get the most of their tour on an electric-powered tram. You can see a life-size photo of a miner next to a giant ruler showing the constricting effect of Floor Heave and Ceiling Sag and a stripped-down, post-Apocalyptic Road Warrior-type car.

There is a Garden of Eden in Lucas, Kansas. A concrete Adam and Eve greet you; Eve offers an Apple of Friendship. Above them on tall concrete pillars are the Devil, frolicking concrete children, and two love storks. To the left, high in the air, an all-seeing concrete eye watches over the Garden.

Are you now interested in traveling through Kansas? Then, plan to visit Kansas with friends, right away. The travel will be a good experience for you
