Now, let's go through California. Do you want a unique trip on Rt. 66 in California? Then I suggest 3 places to enjoy and have fun.

First of all, when you drive along Essex in Barstow you can see Amboy Crater, a large extinct volcano. The view is magnificent. Maybe you think this is nothing but a wilderness but the scenery is fantastic and a great place to visit.

As you travel to California you can go to the Mojave Desert and get an a real desert experience - hot and dry. It's a National Preserve in California. There are wild flowers and mule deer. I hope to you go there and see it "up close and personal"

Above all this, have you heard of Will Rogers? He is a celebrity in California. You can visit Will Rogers Memorial Park and graveyard. You can spend some quiet time thinking about Will Rogers and others who have moved on to the next life.

Are these topics interesting to you? Believe it or not, this is what I suggest to young people for their trip down RT. 66 in California. Get your kicks on Route 66! in California. Bye~ bye~.
